DETAILED ACTION

Drawings

This application has been filed with 4 sheets of formal drawings, and they are accepted for examining purposes.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 16-18, 24 are drawn to a goods and/or services requisition and supply system (US classification 705/28).
 - II. Claims 13-15, 21 are drawn to a vending device having remote control ability (US classification D20/1).
 - III. Claims 19-20 are drawn to a computer readable memory storing instructions for controlling a computer system (US classification 711/100).
 - IV. Claims 22-23 are drawn to a method of providing goods and/or services items to a person using a computer system (US classification 705/26).
4. The above inventions are distinct, each from the other because inventions I, II, III, and IV contain different inventions as defined by different US classifications (inventions are different due to different modes of operation, or different functions, or different effects (MPEP 806.04, MPEP 808.01)). The inventions of Group I is about a system (e.g., a gas dispenser at a gas station),

Group II is about a vending device (a lottery ticket selling machine at a 7-11 store), Group III is about a specific computer memory, and Group IV is about a method of providing goods and/or services (e.g., online e-commerce). The invention of Group III is of such a breadth that it may be directed to any non-specific use for any purpose.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matters, (i.e., the search required for Group II may not required for Group III, IV), restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
